PROFESSIONAL SUMMARY

Robotics and Automation Engineering student with hands-on experience in ROS2, Gazebo, PLC, SCADA, HMI, Industrial Automation, and robotic simulation through internships and academic projects. Currently gaining practical exposure to automotive manufacturing, industrial robotic work-cells, and simulation workflows through an ongoing MNC internship. Familiar with PLC ladder logic, industrial robot systems, IIoT, and Siemens Process Simulate, with a strong interest in industrial automation and smart manufacturing.

TECHNICAL SKILLS

Automation & Controls :

PLC (Siemens, Delta), SCADA, HMI, Industrial Automation

Programming:

Python, C

Robotics & Simulation:

ROS 2, Gazebo, Fusion 360, Solidworks RoboDK

Systems & Concepts:

IIoT, Sensor Integration, Industrial Automation

INTERNSHIP EXPERIENCE

Robotics Simulation Intern

Hirotec India (MNC) | 05th August 2026 – Present

- Gaining practical exposure to **automotive manufacturing processes** and **industrial robotic work-cell** systems. Developing understanding of robotic system layouts, manufacturing sequences, and automation workflows used in automotive production.
- Gaining hands-on familiarity with Siemens Process Simulate for robotic work-cell simulation and manufacturing process analysis.

Linkedin : Robotics Simulation Intern at Hirotec India

ROS Development Intern

Karthikesh Robotics Private Limited (KKR Pvt. Ltd.) | June 2025 – August 2025

- Developed custom URDF robot models with integrated sensors and implemented robot navigation in ROS2 and Gazebo.
- Monitored robot trajectory, validated system performance, and debugged simulation using RViz and ROS2 visualization tools.

Linkedin : Line following four wheeled robot integrated with camera simulation in ROS2

Embedded Systems & Robotics Intern

NxtGen Instruments | 1st June 2026 - 30th June 2026

- Developed an ESP32-based IoT Smart Agriculture Robot by integrating environmental sensors for real-time monitoring and precision irrigation.
- Implemented remote robot control using the Blynk platform and interfaced motors, relay modules, and LCD for embedded automation.

Linkedin : Internship completion and project photos

EDUCATION

Goverment Higher Secondary School - Kanjikovil, Erode, Tamilanadu, India
Higher Secondary Education (12th Grade) | **Score :** 541/600 **(**90.16)%
(2023)

Sri Ramakrishna Engineering College - Coimbatore, Tamilnadu, India
Bachelor of Engineering: Robotics & Automation **CGPA:** 8.66
Expected Graduation: 2027

PROJECTS

ROS2-Based Autonomous Delivery Robot (Butler Robot) June 2025 - May 2026

- Developed an autonomous delivery robot using ROS2 with distributed node architecture, publisher–subscriber communication, and obstacle-aware navigation.
- Integrated a web-based interface for task allocation, order management, and real-time robot monitoring.

Linkedin : Autonomous Delivery Robot

PLC-based automated box sorting & monitoring system April - 2025

- Developed a PLC-based automated box sorting system using Ladder Logic to detect and separate short and tall boxes across two conveyor systems.
- Implemented sensor-based sorting, industrial interlocks, timers, counters, MCR logic, and emergency-stop controls for reliable sequence operation. Designed an HMI for real-time conveyor status monitoring, sensor visualization, and production count tracking.

Working Video : PLC-based automated box sorting & monitoring system

Multi-Purpose Agriculture Robot September 2024 – May 2025

- Developed a multifunctional agricultural robot for ploughing, seed sowing, fertilizing, grass cutting, and weeding using differential-drive locomotion.
- Implemented servo-based mechanisms and a mobile control application for wireless robot operation.

Linkedin : Multipurpose AgriBot Final Product

CERTIFICATIONS

NPTEL – Computer Integrated Manufacturing
IIT Kanpur (SWAYAM) | Jan–Apr 2026

- Elite Certification with **90%** score (Top 5%)
- Covered manufacturing automation, CAD/CAM, and CIM concepts.

Linkedin : Course completion certificate

NPTEL – Introduction to Industry 4.0 and Industrial Internet of Things
IIT Kharagpur (SWAYAM) | Jul–Oct 2025

- Elite Certification with **75**% score
- Covered IIoT architecture, cyber-physical systems, smart manufacturing, and industrial automation

Linkedin : Course completion certificate
