+917395852890

PROFESSIONAL SUMMARY

Robotics and Automation Engineering student with hands-on experience in ROS2, Gazebo, Embedded Systems, PLC, SCADA, HMI, and Industrial Automation. Skilled in robotic simulation, IoT, autonomous systems, and embedded application development through internships and academic projects.

TECHNICAL SKILLS

Automation & Controls :

PLC (Siemens, Delta), SCADA, HMI

Programming:

Python, C

Robotics & Simulation:

ROS 2, Gazebo, Fusion 360, Solidworks
RoboDK

Systems & Concepts:

IIoT, Sensor Integration, Industrial
Automation

INTERNSHIP EXPERIENCE

ROS Development Intern

Karthikesh Robotics Private Limited (KKR Pvt. Ltd.) | June 2025 – August 2025

- Developed custom URDF robot models with integrated sensors and implemented robot navigation in ROS2 and Gazebo.
- Monitored robot trajectory, validated system performance, and debugged simulation using RViz and ROS2 visualization tools.

Linkedin : Line following four wheeled robot integrated with camera simulation in ROS2

Embedded Systems & Robotics Intern

NxtGen Instruments | 1st June 2026 - 30th June 2026

- Developed an ESP32-based IoT Smart Agriculture Robot by integrating environmental sensors for real-time monitoring and precision irrigation.
- Implemented remote robot control using the Blynk platform and interfaced motors, relay modules, and LCD for embedded automation.

EDUCATION

Goverment Higher Secondary School - Kanjikovil, Erode, Tamilnadu, India

Higher Secondary Education (12th Grade) | **Score : 541/600 (90.16)%**
(2023)

Sri Ramakrishna Engineering College - Coimbatore, Tamilnadu, India

Bachelor of Engineering: Robotics & Automation CGPA: 8.66

Expected Graduation: 2027

PROJECTS

Multi-Purpose Agriculture Robot

Sept 2024 - May 2025

- Designed and developed a Bluetooth-controlled multi-functional agricultural robot capable of ploughing, seed sowing, fertilizing, grass cutting, and weeding operations.
- Implemented differential drive locomotion using dual L298N motor drivers and engineered servo-based seed dispensing with relay-controlled high-current pump and cutting mechanisms.
- Developed a custom mobile control application using MIT App Inventor for wireless robot operation and real-time command execution

Linkedin : [Multipurpose AgriBot Final Product](#)

ROS2-Based Autonomous Delivery Robot

June 2025 - May 2026

- Developed an autonomous food delivery robot using ROS2 middleware with distributed node architecture and real-time publisher-subscriber communication
- Designed and integrated a web-based interface for order management, task allocation, and real-time monitoring
- Built and validated a functional prototype enabling efficient and contactless delivery in structured environments. Implemented closed-loop motion control and obstacle-aware navigation for safe indoor operation

ACHIEVEMENTS

First Prize – Project Expo | ROBOKRYON'26 (National Level)

Erode Sengunthar Engineering College | March 2026

- Awarded 1st Prize with cash prize at a national-level robotics and innovation competition
- Project: Autonomous Delivery Robot for Multiple Platforms

Linkedin : [First Prize at Project Expo](#)

CERTIFICATIONS

NPTEL – Introduction to Industry 4.0 and Industrial Internet of Things

IIT Kharagpur (SWAYAM) | Jul–Oct 2025

- Elite Certification with 75% score
- Covered IIoT architecture, cyber-physical systems, smart manufacturing, and industrial automation

Linkedin : [Course completion certificate](#)

NPTEL – Computer Integrated Manufacturing

IIT Kanpur (SWAYAM) | Jan–Apr 2026

- Elite Certification with 90% score (Top 5%)
- Covered manufacturing automation, CAD/CAM, and CIM concepts.

Linkedin : [Course completion certificate](#)
